HOW TO USE THIS MAP

As a Learning Guide

- Don't try to learn everything at once
- Pick one branch → master it → move to next
- Each branch = 1-2 months of focused learning

As a Business Tool

- Map your current clients to branches (what do they need?)
- Identify which services have highest demand in your network
- Price your services based on branch complexity

As a Hiring Guide

- When you hire freelancers, match them to specific branches
 - Don't hire "generalist marketers" - hire specialists per branch
 - Example: SEO specialist + Social media manager + Content writer
-

BRUTAL TRUTHS

What Works:

- SEO (everyone needs it, ongoing revenue)
- Social media content (businesses are desperate for this)
- WhatsApp marketing (India-specific goldmine)
- Google Ads (immediate results = happy clients)

What's Overhyped:

- TikTok/Instagram viral strategies (too unpredictable)
- Programmatic advertising (too complex for SMBs)
- Blockchain/Web3 marketing (future, not now)
- Traditional media (dying, expensive, hard to track ROI)

What's Underrated:

- Email marketing (highest ROI, 4200% average)
 - Google Business Profile optimization (free leads)
 - LinkedIn for B2B (ignored by most Indian agencies)
 - Simple content calendars (consistency > virality)
-
