WHEN TO DO IT YOURSELF VS. HIRE FREELANCER

Do It Yourself (You):

- Strategy and planning (always you)
- Client communication (always you in first 6 months)
- Quality control and final review (always you)
- Reporting and client meetings (you present, freelancer prepares)
- Projects < ₹15,000/month (not enough margin to outsource)

Hire Freelancer:

- Execution work (writing, designing, link building)
- Technical tasks (GA4 setup, ad campaign management)
- Time-consuming tasks (content creation, video editing)
- Specialized skills you don't have (e.g., programmatic ads)

- Projects > ₹15,000/month (margin justifies outsourcing)

Hybrid (You + Freelancer):

- You: Strategy, brief creation, review, client presentation
 - Freelancer: Research, execution, draft deliverables
 - You: Final polish and delivery
-
