

PAID ADVERTISING MASTERY - REVENUE-FIRST APPROACH

Google Ads vs Meta Ads | Competitor Research | When to Use Which

No Fluff - Only What Makes Money

Your Learning Curve - STEP 1: KNOWLEDGE (Focused Edition)

Created for: Web Agency Owner Learning Paid Marketing

Focus: Google Ads + Meta Ads + Competitor Analysis

Outcome: Know which platform to use, when, and how to spend ₹1 and make ₹3+

Date: January 2026

DOCUMENT STRUCTURE

PART 1: FOUNDATION (Before Spending ₹1)

- How paid marketing actually works (funnel reality)
- Google vs Meta — fundamental difference
- Budget planning framework
- When NOT to run ads (save money)

PART 2: COMPETITOR ANALYSIS (Research Before Spending)

- Free tools for competitor spying
- Meta Ad Library walkthrough (see their exact ads)
- Google competitive research
- Competitor analysis framework
- Finding opportunities competitors miss

PART 3: GOOGLE ADS (High-Intent = Buyer Ready)

- Why Google Ads works (search intent)
- Campaign types and when to use
- Keyword research (free method)
- Ad copywriting that converts
- Budget calculation formula
- Common mistakes (money burners)
- For YOUR agency specifically

PART 4: META ADS (Audience Targeting = Show Your Offer)

- Why Meta Ads works (interest targeting)
- Campaign objectives explained
- Audience targeting (find your customers)
- Ad creative best practices
- Retargeting (highest ROI strategy)
- Common mistakes (money burners)

└─ For YOUR agency specifically

PART 5: GOOGLE vs META — THE DECISION MAP

└─ When Google is better (scenarios)

└─ When Meta is better (scenarios)

└─ When to run BOTH

└─ Budget split framework

└─ Real case studies (what worked)

PART 6: REVENUE TRACKING & OPTIMIZATION

└─ Setting up conversion tracking (critical!)

└─ Metrics that matter (CPA, ROAS, LTV)

└─ How to know if ads are working

└─ When to scale vs when to stop

└─ Monthly optimization routine

PART 1: FOUNDATION (BEFORE SPENDING ₹1)

1.1 HOW PAID MARKETING ACTUALLY WORKS

The Funnel Reality (Not Theory)

TRADITIONAL MARKETING FUNNEL (What Everyone Teaches):

Awareness → Interest → Consideration → Purchase

↓

THIS IS TOO VAGUE. HERE'S THE REAL FUNNEL:

PAID ADS FUNNEL (Reality):

1. COLD TRAFFIC (Never heard of you)

└─ Goal: Make them aware you exist

└─ Where: Meta Ads (interest targeting), Google Display, YouTube

└─ Cost: Low CPC (₹5-15), but low conversion

2. WARM TRAFFIC (Heard of you, considering)

└─ Goal: Make them interested/engaged

└─ Where: Google Search (branded keywords), Retargeting ads

└─ Cost: Medium CPC (₹15-50), medium conversion

3. HOT TRAFFIC (Ready to buy, just choosing vendor)

└─ Goal: Convert them NOW

└─ Where: Google Search (high-intent keywords), Meta retargeting

└─ Cost: High CPC (₹50-200+), HIGH conversion

The Truth Most Agencies Hide:

- **Cold traffic RARELY converts directly** (maybe 0.5-2% conversion rate)
- **Warm traffic converts better** (2-5% conversion rate)
- **Hot traffic converts best** (5-15% conversion rate)

What This Means for Your Budget:

❌ **WRONG:** Spend ₹20K on cold Meta ads expecting immediate sales

✅ **RIGHT:** Spend ₹15K on Google Search (hot) + ₹5K on Meta retargeting (warm)

Why? Hot traffic is **SEARCHING** for your solution = ready to buy.

1.2 GOOGLE vs META — FUNDAMENTAL DIFFERENCE

The Core Philosophy

GOOGLE ADS = PULL MARKETING (They come to you)

- User has a **NEED/PROBLEM**
- User **SEARCHES** for solution (e.g., "web design agency Ahmedabad")
- Your ad appears → User clicks → High intent
- Conversion Rate: 2-8% (they already want what you offer)

Example:

Someone searches "best web designer in Ahmedabad"

- They **NEED** a website
- They're **COMPARING** options
- High chance they'll contact 2-3 agencies
- **YOUR** ad gets them to call **YOU**

META ADS = PUSH MARKETING (You interrupt them)

- User is scrolling feed (no immediate intent)
- Your ad **INTERRUPTS** their scroll
- You **CONVINCE** them they need your offer
- Conversion Rate: 0.5-3% (you're creating demand)

Example:

Local restaurant owner scrolling Facebook

- **NOT** thinking about websites right now
- Sees your ad: "Your Restaurant Needs a Website to Get More Orders"
- Stops scrolling, reads ad
- Maybe clicks, maybe not (depends on how good ad is)

Visual Analogy:

- **Google Ads:** You open a shop on a busy market street (people LOOKING to buy)
 - **Meta Ads:** You have a billboard on the highway (people passing by, might notice)
-

1.3 BUDGET PLANNING FRAMEWORK

Minimum Viable Budget (India Context)

GOOGLE ADS MINIMUM:

Calculation:

Average CPC (Cost Per Click) $\times$ Desired Clicks = Minimum Budget

Example (Web Design Agency):

- └ Keyword: "web design Ahmedabad"
- └ Average CPC: ₹80 (checked in Google Keyword Planner)
- └ Desired clicks: 100/month (to test if it works)
- └ Minimum budget: $₹80 \times 100 = ₹8,000/\text{month}$ ad spend
- └ Add 30% buffer for learning: $₹8,000 \times 1.3 = ₹10,400/\text{month}$

TOTAL MINIMUM (Google): ₹10,000-12,000/month

META ADS MINIMUM:

Calculation:

Daily budget $\times$ 30 days = Monthly budget

(Meta recommends at least ₹500/day to exit learning phase)

Minimum budget: $₹500/\text{day} \times 30 = ₹15,000/\text{month}$

TOTAL MINIMUM (Meta): ₹15,000/month

COMBINED BUDGET (Both Platforms):

Starting Budget: ₹25,000-30,000/month total

Split:

- └─ Google: ₹12,000 (40%) — Higher intent
- └─ Meta: ₹15,000 (50%) — Broader reach
- └─ Buffer: ₹3,000 (10%) — Testing new ads/audiences

WHY THIS SPLIT?

Google gets slightly less because CPC is higher (fewer clicks but better quality)

Meta gets more because you need volume to find what works

Budget Scaling Framework

MONTH 1: Testing Phase

Budget: ₹25,000-30,000

Goal: Find what works (which keywords, which audiences, which ads)

Expected ROI: Break-even or slight loss (you're buying data)

MONTH 2: Optimization Phase

Budget: ₹30,000-40,000 (increase 20-30%)

Goal: Double down on what worked in Month 1

Expected ROI: 1.5-2x (starting to be profitable)

MONTH 3+: Scaling Phase

Budget: Increase 50-100% IF profitable

Goal: Scale winners, cut losers

Expected ROI: 2-5x (profitable campaigns only)

RULE: Only scale if CPA (Cost Per Acquisition) stays below customer value

1.4 WHEN NOT TO RUN ADS (Save Money)

Scenarios Where Ads Will WASTE Money

✗ DON'T RUN ADS IF:

1. Your Website Sucks

└─ If landing page has:

- └─ No clear headline
- └─ Slow loading (3+ seconds)
- └─ No mobile optimization
- └─ Confusing navigation
- └─ No clear CTA (call-to-action)

→ FIX WEBSITE FIRST, THEN RUN ADS

2. You Don't Have Conversion Tracking

└─ If you can't measure:

- └─ Which ad brought which customer
- └─ Cost per lead/sale
- └─ ROI

→ SET UP TRACKING FIRST (Google Analytics, Meta Pixel)

3. Your Offer Isn't Clear

└─ If customer asks "What exactly do you do?":

- └─ Your messaging is confusing
- └─ Ads will just waste money

→ CLARIFY OFFER, THEN RUN ADS

4. You Have No Budget for 3 Months

└─ Ads need minimum 3 months to:

- └─ Month 1: Test and learn
- └─ Month 2: Optimize
- └─ Month 3: Scale

→ If you only have budget for 1 month, DON'T START

5. Your Product/Service Isn't Ready

└─ If you can't deliver:

- └─ Fast response (within 2-4 hours)
- └─ Good customer experience
- └─ Consistent quality

→ Ads will bring customers → You'll disappoint them → Bad reviews

6. Market is Too Small

└─ If your audience is <1,000 people:

- └─ Ads won't get enough data to optimize
- └─ Better to do direct outreach

7. You're in a Legal/Regulated Industry Without Compliance

└─ Healthcare, finance, legal, alcohol, etc.

- └─ Google/Meta have strict policies

└─ Your ads might get disapproved
→ CHECK POLICIES FIRST

✓ WHEN PAID ADS MAKE SENSE:

1. Website is optimized (fast, clear, mobile-friendly)
2. Tracking is set up (you'll know what works)
3. Offer is clear (one-sentence explanation)
4. Budget for 3+ months (₹25K-30K/month minimum)
5. Fast response system (answer leads within hours)
6. Market size >10,000 people (enough to target)
7. Proven product/service (you've delivered before, happy customers exist)

PART 2: COMPETITOR ANALYSIS (RESEARCH BEFORE SPENDING)

2.1 FREE TOOLS FOR COMPETITOR RESEARCH

Tool Stack (₹0 Cost)

TIER 1: Essential (Use These First)

1. META AD LIBRARY (100% Free, GOLDMINE)

URL: facebook.com/ads/library

What it shows:

- ALL active ads by any business on Facebook/Instagram
- Ad creative (images, videos, copy)
- Ad start date (how long they've been running it)
- Platforms (Facebook, Instagram, Messenger, Audience Network)
- For some countries: Ad spend ranges (not India, unfortunately)

Why it's powerful:

- If competitor is running an ad for 6+ months = IT'S WORKING
(Nobody spends money on ads that don't work for 6 months)

2. GOOGLE KEYWORD PLANNER (Free with Google Ads account)

URL: ads.google.com → Tools → Keyword Planner

What it shows:

- Search volume for keywords (monthly searches)
- Competition level (Low, Medium, High)
- Suggested bid (CPC range)
- Related keywords

Why it's powerful:

- Know exactly what people search for in your industry

3. GOOGLE TRENDS (100% Free)

URL: trends.google.com

What it shows:

- Search interest over time (trending up or down?)
- Related queries (what else are people searching?)
- Geographic breakdown (which cities search most)
- Seasonal patterns (when is peak season?)

Why it's powerful:

- Don't advertise during low season, save money for peak season

4. GOOGLE SEARCH (Free, Obvious but Underused)

What to search:

- Your target keywords (e.g., "web design Ahmedabad")
- See who's running ads (top 3-4 spots)
- Click on ads → Analyze their landing pages
- See what offer they're making

Why it's powerful:

- If someone is in top spot for months = they're profitable

TIER 2: Nice to Have (Free Tiers Available)

5. UBERSUGGEST (Free tier: 3 searches/day)

URL: neilpatel.com/ubersuggest

What it shows:

- └— Keyword ideas
- └— SEO difficulty
- └— Paid difficulty (CPC competition)
- └— Content ideas

Free limit: 3 searches/day (enough for basic research)

6. SPYFU (Free tier: Limited data)

URL: spyfu.com

What it shows:

- └— Competitor's Google Ads keywords (which keywords they bid on)
- └— Estimated ad spend
- └— Ad history

Free limit: Basic overview (detailed data is paid)

7. SIMILARWEB (Free tier: Overview)

URL: similarweb.com

What it shows:

- └— Competitor website traffic (estimated)
- └— Traffic sources (search, social, paid, direct)
- └— Top keywords

Free limit: Overview data only (detailed data is paid)

2.2 HOW TO SPY ON COMPETITORS (Step-by-Step)

META AD LIBRARY WALKTHROUGH

STEP 1: Identify Your Competitors

Make a list:

- └— 5 direct competitors (same service, same city)
- └— 3 aspirational competitors (bigger agencies you want to become)
- └— 2 national competitors (see what works at scale)

STEP 2: Search in Meta Ad Library

1. Go to: facebook.com/ads/library
2. Select country: India
3. Select category: All ads
4. Search competitor's business name

What you'll see:

- └─ All their active ads (right now)
- └─ Click on each ad to see:
 - └─ Platforms: Facebook, Instagram, Messenger
 - └─ Started running: [Date]
 - └─ Ad creative + copy

STEP 3: Analyze Each Ad

For each competitor ad, note:

1. AD CREATIVE:

- └─ Image or video?
- └─ What's the main visual (website screenshots, team photo, client logos)?
- └─ Colors used (professional, bright, dark)?

2. AD COPY:

- └─ Headline (main promise)
- └─ Body text (what pain point do they address?)
- └─ CTA (call-to-action: Learn More, Call Now, Get Quote)

3. OFFER:

- └─ What are they selling? (Free consultation, Discount, Portfolio showcase)
- └─ Price mentioned or not?
- └─ Urgency? (Limited time, First 10 customers)

4. DURATION:

- └─ If running 1-3 months = Testing
- └─ If running 6+ months = WORKING (profitable)
- └─ If stopped after 2 weeks = Didn't work

STEP 4: Document Findings

Create spreadsheet:

Competitor	Ad Type	Running Since	Main Message	Offer	What's Working
Agency A	Video	8 months	"Get website in 7 days"	₹29,999 fixed	Long-running = working
Agency B	Image	2 months	"Free consultation"	No price	Testing phase
Agency C	Carousel	1 year	"Portfolio showcase"	Case studies	Very successful

STEP 5: Find Opportunities (What Competitors Are Missing)

Look for gaps:

- Are they all targeting the same message? (Do something different)
- Are they all using images? (Use video to stand out)
- Are they all hiding price? (Show transparent pricing)
- Are they all targeting broad audience? (Niche down to specific industry)
- Are they all selling websites? (Sell outcome: "Get 10 leads/month from your website")

GOOGLE ADS COMPETITIVE RESEARCH

METHOD 1: Manual Search

STEP 1: Open incognito browser (so your personal search history doesn't affect results)

STEP 2: Search your target keywords

Examples:

- "web design Ahmedabad"
- "website developer Gujarat"
- "affordable website design India"
- "WordPress developer near me"

STEP 3: Analyze ads (top 3-4 results with "Sponsored" tag)

Note:

- Headline 1, 2, 3 (what's their main hook?)
- Description (what benefits do they highlight?)
- Ad extensions:
 - Sitelinks (additional links below ad)
 - Callouts (bullet points)
 - Call extension (phone number)
 - Location extension (address)
- Landing page (click ad, see where it goes)

METHOD 2: Google Keyword Planner (Competitive Analysis)

STEP 1: Go to Google Ads → Tools → Keyword Planner

STEP 2: Click "Discover new keywords"

STEP 3: Enter your service + location

Example: "web design" + "Ahmedabad"

STEP 4: Review results:

- └ Search volume (how many searches/month)
- └ Competition (Low/Medium/High)
- └ Top of page bid (low range): ₹X
- └ Top of page bid (high range): ₹Y
- └ This tells you what competitors are WILLING TO PAY per click

STEP 5: Identify opportunities:

- └ Low competition + decent volume = OPPORTUNITY
- └ High competition + high CPC = AVOID (or be prepared to spend)

METHOD 3: Auction Insights (If You're Already Running Ads)

Once you have active Google Ads campaign:

STEP 1: Google Ads → Campaigns → Select campaign

STEP 2: Click "Auction Insights" (under campaign settings)

STEP 3: See:

- └ Competitors bidding on same keywords
- └ Impression share (% of times they show up vs you)
- └ Overlap rate (how often you compete for same auction)
- └ Position above rate (how often they rank above you)
- └ Top of page rate (how often they're in top 4 spots)

This tells you:

- └ Who's your REAL competition (not just anyone in your industry, but who's bidding against you)

2.3 COMPETITOR ANALYSIS FRAMEWORK

The 5-Question Framework

For EACH competitor, answer:

1. WHO ARE THEY TARGETING?

- └— Geography (local, regional, national)
- └— Industry (all businesses or specific niche?)
- └— Business size (startups, SMBs, enterprises)
- └— Pain point (what problem are they solving?)

YOUR OPPORTUNITY:

- └— If everyone targets "all businesses" → You niche down to "restaurants only"

2. WHAT KEYWORDS/INTERESTS ARE THEY USING?

Google Ads:

- └— Check Google Keyword Planner for their likely keywords
- └— Search those keywords, see if their ad appears

Meta Ads:

- └— Look at their ad creative (who would this appeal to?)
- └— Guess interests: "small business owners", "entrepreneurs", "startups"

YOUR OPPORTUNITY:

- └— If everyone uses broad keywords → You target long-tail (e.g., "WordPress website for restaurants Ahmedabad")

3. WHAT MESSAGING WORKS FOR THEM?

- └— Main headline (what's the promise?)
- └— Emotional appeal (fear, desire, urgency?)
- └— Proof (testimonials, case studies, numbers?)

Example messaging:

- └— Competitor A: "Professional websites from ₹29,999"
- └— Competitor B: "Get your business online in 7 days"
- └— Competitor C: "50+ happy clients in Ahmedabad"

YOUR OPPORTUNITY:

- └— If everyone focuses on price → You focus on speed
- └— If everyone focuses on speed → You focus on results ("website that gets customers")

4. WHAT'S THEIR OFFER?

- └— Free consultation?
- └— Discount (20% off first project)?
- └— Package deal (₹X for website + logo + hosting)?
- └— Risk reversal (money-back guarantee)?

YOUR OPPORTUNITY:

- └— If everyone offers discounts → You offer free website audit
- └— If everyone offers free consultation → You offer fixed-price packages (no surprises)

5. WHERE IS THE GAP?

- └— What are competitors NOT saying?

- └— What audience are they NOT targeting?
- └— What problem are they NOT solving?

Example gaps:

- └— Everyone targets new businesses → You target businesses with OLD, outdated websites (redesign market)
- └— Everyone showcases design → You showcase RESULTS (client got 50 leads from website)
- └— Everyone has generic messaging → You have industry-specific case studies

2.4 LIVE PLATFORM WALKTHROUGHS

Meta Ad Library — Complete Walkthrough

SCENARIO: You want to research web design competitors in Ahmedabad

STEP-BY-STEP:

1. Open: facebook.com/ads/library

2. Filters:

- └─ Ad category: All ads
- └─ Country: India
- └─ Search: "web design ahmedabad" OR specific competitor name

3. What you see:

- └─ List of all active ads containing those keywords
- └─ Business name (click to see their Facebook page)
- └─ Ad preview (image/video + copy)
- └─ Platforms (Facebook, Instagram, etc.)
- └─ Date started running

4. Click on an ad:

- └─ See full ad creative
- └─ See all variations (if they're A/B testing multiple versions)
- └─ "See ad details" → Shows:
 - └─ Exact start date
 - └─ Platforms running on
 - └─ (In some countries: Spend range — not available in India yet)

5. Analyze patterns:

- └─ Which ads have been running longest? (6+ months = working)
- └─ Do multiple agencies use similar creative? (Industry standard)
- └─ What's unique? (Standout ads)

6. Document:

- └─ Screenshot ads that have been running 6+ months
- └─ Note their messaging, offer, CTA
- └─ Identify what you can do BETTER or DIFFERENT

ADVANCED TIPS:

Tip 1: Check Competitor's Facebook Page

- └ From Ad Library, click their business name
- └ Go to their Facebook page
- └ Check "Page Transparency" (bottom of page)
- └ See:
 - └ Page created date
 - └ Page managers (country)
 - └ Previous page names (did they rebrand?)

Tip 2: Reverse Image Search

- └ If competitor has great ad creative
- └ Right-click image → Search Google for image
- └ Find original source (stock photo? or custom?)
- └ Inspiration for your own creative

Tip 3: Track Over Time

- └ Check Ad Library every week
- └ Note:
 - └ Which ads stopped running (didn't work)
 - └ Which ads are still running (working)
 - └ New ads launched (they're testing new approach)

Google Ads Competitive Research — Complete Walkthrough

SCENARIO: You want to see who's bidding on "web design Ahmedabad"

STEP-BY-STEP (Manual Method):

1. Open incognito browser (Chrome: Ctrl+Shift+N)
 - └─ Why incognito? Your search history affects results
2. Go to google.co.in (India version)
3. Search: "web design ahmedabad"
4. Identify ads (top 3-4 results with "Sponsored" label)
5. For each ad, note:
 - └─ Headline 1: [Main hook]
 - └─ Headline 2: [Supporting point]
 - └─ Headline 3: [Third point]
 - └─ Description: [Body text, 2 lines]
 - └─ Display URL: [yourwebsite.com]
 - └─ Ad Extensions:
 - | └─ Sitelinks (4 additional links below ad)
 - | └─ Callouts (bullet points: "Free Consultation", "Fast Delivery")
 - | └─ Call extension (phone number click-to-call)
 - | └─ Location extension (address)
6. Click ad → Analyze landing page:
 - └─ Headline matches ad? (consistency is key)
 - └─ Clear CTA? (form, phone number, chat)
 - └─ Social proof? (testimonials, logos, reviews)
 - └─ Fast loading? (test on mobile)
 - └─ Offer clear? (price, package, benefit)
7. Take screenshots and document
8. Repeat for:
 - └─ Different variations of keywords:
 - | └─ "website developer ahmedabad"
 - | └─ "best web design company gujarat"
 - | └─ "affordable website design india"
 - └─ Different times of day (ads change based on budget pacing)
 - └─ Different locations (if you use VPN, see ads in other cities)

STEP-BY-STEP (Google Keyword Planner Method):

1. Go to: ads.google.com
2. Create account (or log in)
3. Skip campaign creation (you're just researching)
4. Go to: Tools → Keyword Planner
5. Click: "Discover new keywords"

6. Enter:

- └─ Keyword: "web design"
- └─ Location: Ahmedabad, Gujarat, India
- └─ Language: English

7. Review results:

Example output:

Keyword	Avg. Monthly Searches	Competition	Low Bid	High Bid
web design ahmedabad	1,000-10,000	High	₹60	₹180
website developer ahmedabad	100-1,000	Medium	₹40	₹120
cheap website design	100-1,000	Low	₹20	₹60

8. What this tells you:

- └─ Search volume = Market size
- └─ Competition = How many others are bidding
- └─ Bid range = How much you'll need to spend per click

9. Export to spreadsheet:

- └─ Filter by: Low competition + decent volume
- └─ These are your opportunity keywords
- └─ Start with these (easier to win, cheaper CPC)

STEP-BY-STEP (If You Have Active Campaign — Auction Insights):

1. Google Ads → Campaigns

2. Select your Search campaign

3. Click "Auction Insights" tab

4. Select date range (last 30 days or 90 days)

5. Review table:

Example output:

Competitor Domain	Impr. Share	Overlap Rate	Position Above	Top of Page
competitor-a.com	35%	60%	40%	80%
competitor-b.com	28%	50%	30%	75%
your-agency.com	25%	—	—	70%

What this means:

- Impression Share: % of times their ad showed (vs total auctions)
- Overlap Rate: % of times you both showed for same search
- Position Above: % of times they ranked above you
- Top of Page: % of times they were in top 4 spots

6. Action items:

- If competitor-a has 35% impression share and you have 25%
 - They're spending more OR have better Quality Score
- If their Position Above Rate is 40%
 - Your ads need improvement (better copy OR higher bid)
- If you want to compete, increase budget OR improve ad quality

2.5 COMPETITOR ANALYSIS TEMPLATE (Copy & Use)

COMPETITOR ANALYSIS SPREADSHEET

TAB 1: META ADS RESEARCH

Competitor	Ad Creative Type	Main Message	Offer	Running Since	Status	Notes
Agency A	Video	"Website in 7 days"	₹29,999	Oct 2025	Active 4 months	Long-running = working
Agency B	Image carousel	"Portfolio showcase"	Free quote	Dec 2025	Active 2 months	Testing
Agency C	Single image	"Mobile-friendly websites"	20% off	Aug 2025	Active 6 months	Very successful

MY OPPORTUNITY: Everyone focuses on speed/price → I'll focus on RESULTS ("Get 50 leads/month from your website")

TAB 2: GOOGLE ADS RESEARCH

Keyword	Search Volume	Competition	CPC Range	Top Advertisers	Landing Page Quality
web design ahmedabad	1,000-10K	High	₹60-180	5-7 competitors	Average (slow load)
website developer ahmedabad	100-1K	Medium	₹40-120	3-4 competitors	Good
wordpress website ahmedabad	100-1K	Low	₹30-80	1-2 competitors	OPPORTUNITY

MY OPPORTUNITY: Target long-tail keywords with low competition ("WordPress website for restaurants Ahmedabad")

TAB 3: COMPETITIVE MESSAGING ANALYSIS

Competitor	Main Promise	Pain Point Addressed	Proof	CTA	What's Missing
Agency A	"Fast delivery"	Business needs website urgently	"7-day guarantee"	Call Now	No price transparency
Agency B	"Affordable"	Cost concern	"₹29,999 fixed"	Get Quote	No portfolio shown
Agency C	"Professional"	Quality concern	"50+ clients"	Free Consultation	No specific outcomes

MY OPPORTUNITY: Combine all three → "Professional website in 7 days, ₹35,000 fixed, proven to get results (portfolio of 50+ clients)"

TAB 4: OPPORTUNITY GAPS

What Everyone Does	What Nobody Does	My Differentiation
Generic "web design"	Industry-specific (restaurants, clinics)	"Websites for Restaurants in Ahmedabad"
Hide pricing	Show transparent pricing	"₹35,000 all-inclusive"
Focus on features	Focus on outcomes	"Get 10 online orders/day from your website"
Long consultation process	Fast, easy quotes	"Get quote in 60 seconds (online form)"

PART 3: GOOGLE ADS (HIGH-INTENT = BUYER READY)

3.1 WHY GOOGLE ADS WORKS (Search Intent)

The Power of Search Intent

THE FUNDAMENTAL TRUTH:

When someone SEARCHES for something on Google, they have INTENT.

Types of search intent:

1. INFORMATIONAL (Research phase)

- Searches: "what is web design", "how to build a website"
- Intent: Learning, not buying yet
- Ad strategy: Offer free guide, blog content (low conversion)

2. NAVIGATIONAL (Looking for specific brand)

- Searches: "WordPress.com", "Wix login"
- Intent: Going to a specific site
- Ad strategy: Bid on your own brand name (protect territory)

3. COMMERCIAL (Comparing options)

- Searches: "best web design companies", "web design vs freelancer"
- Intent: Researching before buying
- Ad strategy: Show your USP, case studies, reviews (medium conversion)

4. TRANSACTIONAL (Ready to buy NOW)

- Searches: "hire web designer", "web design price", "get website made"
- Intent: BUYING DECISION IMMINENT
- Ad strategy: Clear offer, CTA, phone number (HIGH conversion)

EXAMPLE (Web Design Agency):

Search: "web design agency ahmedabad"

- This person is:
 - Based in or targeting Ahmedabad (local)
 - Looking for an AGENCY (not freelancer)
 - Ready to hire (not just learning)
- Conversion probability: 5-10% (if ad + landing page are good)

Compare to:

Search: "what is web design"

- This person is:
 - Just learning
 - Not ready to buy
- Conversion probability: 0.1-0.5% (waste of money to advertise)

WHY THIS MATTERS FOR BUDGET:

❌ **WRONG:** Bid on all keywords (informational + transactional)

└─ Result: High spend, low conversions

✅ **RIGHT:** Bid **ONLY** on transactional + commercial keywords

└─ Result: Lower spend, HIGH conversions

Example:

Month 1 (Wrong way): ₹20,000 spent on 50 keywords (mix of all types) → 5 leads

Month 2 (Right way): ₹20,000 spent on 10 HIGH-INTENT keywords → 20 leads

3.2 CAMPAIGN TYPES (When to Use Which)

Google Ads Campaign Types Explained

GOOGLE ADS OFFERS 5 MAIN CAMPAIGN TYPES:

1. SEARCH CAMPAIGNS ★★ ★ [START HERE]

What it is: Text ads on Google Search results

When someone searches → Your ad appears

Best for:

- └─ High-intent keywords (people actively searching for your service)
- └─ B2B services (web design, consulting, legal)
- └─ Local services (plumber, electrician, restaurant)
- └─ Immediate leads (people ready to buy)

Pros:

- └─ Highest conversion rate (2-8%)
- └─ You control exactly which searches trigger your ad
- └─ Measurable ROI (track every click → lead → sale)

Cons:

- └─ Higher CPC (₹20-200+ per click)
- └─ Limited reach (only people searching those keywords)

YOUR AGENCY: Use Search campaigns for "web design ahmedabad", "hire website developer", etc.

2. DISPLAY CAMPAIGNS ★ [SKIP FOR NOW]

What it is: Image/banner ads on websites across the internet

Appears on news sites, blogs, YouTube sidebars, apps

Best for:

- └─ Brand awareness (reaching lots of people)
- └─ Retargeting (showing ads to people who visited your site)

└─ E-commerce (product showcases)

Pros:

- └─ Cheaper CPC (₹2-15 per click)
- └─ Huge reach (millions of websites)
- └─ Visual ads (can showcase portfolio)

Cons:

- └─ LOW conversion rate (0.1-0.5%)
- └─ People aren't actively searching (interruption marketing)
- └─ Harder to measure quality (lots of clicks, few leads)

YOUR AGENCY: Skip this initially. Use only for retargeting (people who visited your site but didn't contact you).

3. VIDEO CAMPAIGNS (YouTube Ads) ★ [ADVANCED]

What it is: Video ads on YouTube (before/during videos, in search, in sidebar)

Best for:

- └─ Building brand awareness
- └─ Showcasing work (portfolio videos)
- └─ Explaining complex services

Pros:

- └─ Very cheap views (₹1-5 per view)
- └─ Engaging format (video > static image/text)

Cons:

- └─ Requires video production
- └─ Lower direct conversions (good for awareness, not immediate leads)

YOUR AGENCY: Try this after Search campaigns are profitable. Use client testimonial videos or before/after website showcases.

4. SHOPPING CAMPAIGNS ★★ ★ [FOR E-COMMERCE ONLY]

What it is: Product listings with image, price, store name

Appears at top of Google Search for product searches

Best for:

- └─ E-commerce ONLY (selling physical products)
- └─ Example: "buy iPhone 15" → Shopping ads appear

Not applicable for YOUR web agency (you're selling services, not products)

BUT: Offer this to e-commerce clients!

5. APP CAMPAIGNS [SKIP]

What it is: Promote mobile apps across Google network

Only relevant if you have an app to promote

YOUR AGENCY: Not applicable.

DECISION TREE (Which Campaign Type to Use):

START HERE:

Are you selling a physical product?

- └ YES → Shopping Campaign
- └ NO → Continue

Is your goal immediate leads/sales?

- └ YES → Search Campaign ★★ ★
- └ NO → Continue

Do you have a video showcasing your work?

- └ YES → Video Campaign (YouTube)
- └ NO → Continue

Are you retargeting people who visited your site?

- └ YES → Display Campaign (Retargeting)
- └ NO → Start with Search Campaign

FOR YOUR WEB AGENCY:

MONTH 1-3: Search Campaigns ONLY

- └ Target: "web design ahmedabad", "website developer", "hire web designer"
- └ Goal: 10-20 leads/month

MONTH 4-6: Add Display Retargeting

- └ Show ads to people who visited your site but didn't contact
- └ Goal: Convert 10-20% of visitors who initially left

MONTH 7+: Add YouTube (if you have video testimonials/portfolio)

- └ Build brand awareness, showcase work
- └ Goal: Broader reach, more inbound inquiries

3.3 KEYWORD RESEARCH (Free Method)

Finding High-Intent Keywords (₹0 Cost)

STEP 1: Brainstorm Seed Keywords

Think like your customer. What would they search for?

For web design agency:

└─ Service keywords:

- | └─ "web design"
- | └─ "website development"
- | └─ "website design"
- | └─ "web developer"

└─ Location modifiers:

- | └─ + "ahmedabad"
- | └─ + "gujarat"
- | └─ + "india"
- | └─ + "near me"

└─ Intent modifiers:

- | └─ "hire [service]"
- | └─ "best [service]"
- | └─ "affordable [service]"
- | └─ "[service] cost/price"

Combine:

- └─ "web design ahmedabad"
- └─ "hire website developer gujarat"
- └─ "best web design company ahmedabad"
- └─ "affordable website design india"
- └─ "website design cost ahmedabad"

STEP 2: Use Google Keyword Planner (FREE)

1. Go to: ads.google.com → Tools → Keyword Planner

2. Click "Discover new keywords"

3. Enter seed keywords:

- └─ "web design ahmedabad"
- └─ "website developer"
- └─ "hire web designer"

4. Location: Ahmedabad, Gujarat (or all India)

5. Click "Get Results"

6. Review data:

Keyword	Avg Monthly Searches	Competition	Top of Page Bid (Low)	Top of Page Bid (High)
----- ----- ----- ----- -----				
web design ahmedabad	1,000-10,000	High	₹60	₹180
website developer ahmedabad	100-1,000	Medium	₹40	₹120
wordpress website ahmedabad	100-1,000	Low	₹30	₹80
cheap website design ahmedabad	10-100	Low	₹20	₹60

7. Sort by: Competition (Low to Medium) + Decent searches (100+)

- └─ These are your OPPORTUNITY keywords (less competition, cheaper CPC)

STEP 3: Analyze Search Intent

For each keyword, ask:

"If someone searches this, are they ready to buy?"

HIGH INTENT (Target These):

- ✅ "hire web designer ahmedabad" → Transactional
- ✅ "web design price ahmedabad" → Transactional
- ✅ "best web design company ahmedabad" → Commercial
- ✅ "website developer near me" → Transactional

LOW INTENT (Skip These):

- ❌ "what is web design" → Informational
- ❌ "learn web design" → Informational
- ❌ "free website builder" → Not your customer
- ❌ "web design jobs ahmedabad" → Job seekers, not clients

STEP 4: Group Keywords by Theme (Ad Groups)

Create THEMED ad groups (tight keyword grouping = higher Quality Score):

AD GROUP 1: Web Design Services

- └─ web design ahmedabad
- └─ website design ahmedabad
- └─ web designer ahmedabad
- └─ professional web design ahmedabad

AD GROUP 2: Website Development

- └─ website development ahmedabad
- └─ website developer ahmedabad
- └─ web developer ahmedabad
- └─ hire website developer ahmedabad

AD GROUP 3: WordPress Websites

- └─ wordpress website ahmedabad
- └─ wordpress developer ahmedabad
- └─ wordpress website design
- └─ hire wordpress developer

AD GROUP 4: Pricing/Cost Keywords

- └─ website design cost ahmedabad
- └─ web design price ahmedabad
- └─ affordable website design
- └─ cheap website ahmedabad

Why group?

Each ad group gets CUSTOM ads matching those specific keywords

→ Higher relevance → Higher Quality Score → Lower CPC

STEP 5: Choose Match Types

Google Ads has 3 keyword match types:

1. BROAD MATCH (Widest reach, least control)

Syntax: web design ahmedabad

Triggers for:

- └─ "web design ahmedabad"
- └─ "ahmedabad web design services"
- └─ "website creators in ahmedabad"
- └─ Even: "graphic design ahmedabad" (not what you want!)

 **AVOID** for now (wastes money on irrelevant searches)

2. PHRASE MATCH (Moderate reach, moderate control)

Syntax: "web design ahmedabad"

Triggers for:

- └─ "web design ahmedabad"
- └─ "best web design ahmedabad"
- └─ "professional web design ahmedabad service"
- └─ Must contain the phrase in order

 **USE THIS** (good balance)

3. EXACT MATCH (Least reach, most control)

Syntax: [web design ahmedabad]

Triggers for:

- └─ "web design ahmedabad" (exactly)
- └─ Close variants: "web design in ahmedabad", "ahmedabad web design"
- └─ Very tight control

 **USE THIS** for highest-intent keywords

RECOMMENDATION FOR YOUR AGENCY:

- └─ Start with EXACT match for top 10 keywords
- └─ Add PHRASE match for secondary keywords
- └─ Avoid BROAD match (wastes budget)

STEP 6: Add Negative Keywords (Save Money!)

Negative keywords = searches you DON'T want to show for

Examples for web agency:

- └─ "free" → People looking for free services
- └─ "jobs" → Job seekers, not clients
- └─ "course" → People wanting to learn web design
- └─ "tutorial" → Same as above
- └─ "salary" → Looking for web designer salaries
- └─ "freelance" → Looking to hire freelancers (not agencies)
- └─ "cheap" → Low-budget customers (unless you target them)

How to add:

Google Ads → Campaign → Keywords → Negative Keywords → Add

3.4 WRITING ADS THAT CONVERT

Google Search Ad Structure

GOOGLE SEARCH AD ANATOMY:

[HEADLINE 1] | [HEADLINE 2] | [HEADLINE 3]
[Display URL: yourwebsite.com]
[Description Line 1. Description Line 2.]

EXTENSION: Sitelink 1 | Sitelink 2 | Sitelink 3

EXTENSION: 📞 Phone Number

EXTENSION: 📍 Address

EXTENSION: • Callout 1 • Callout 2 • Callout 3

CHARACTER LIMITS:

- └─ Headlines: 30 characters each (3 headlines)
- └─ Descriptions: 90 characters each (2 descriptions)
- └─ Sitelinks: 25 characters each (4 sitelinks)
- └─ Callouts: 25 characters each (4-6 callouts)

The AIDA Formula for Ad Copy

AIDA = Attention → Interest → Desire → Action

ATTENTION (Headline 1): Grab attention, include keyword

- └─ "Professional Web Design Ahmedabad"
- └─ "Website Design in 7 Days"
- └─ "₹35,000 Fixed Price Websites"

INTEREST (Headline 2): Why they should care

- └─ "Mobile-Friendly & Fast Loading"
- └─ "50+ Happy Clients in Gujarat"
- └─ "Get More Customers Online"

DESIRE (Description): What they get, benefits

- └─ "Custom website design built for your business. Includes mobile optimization, SEO, and hosting. Proven to increase online inquiries by 3x."

ACTION (CTA + Extensions): Tell them what to do

- └─ "Call Now for Free Consultation"
- └─ "Get Quote in 60 Seconds"
- └─ Extensions: Phone number, address, sitelinks

Ad Copy Templates (Copy & Use)

TEMPLATE 1: Value-Focused

Headline 1: Professional Web Design [City]

Headline 2: ₹35,000 Fixed Price | 7-Day Delivery

Headline 3: 50+ Happy Clients in [State]

Description 1: Custom website design for your business. Mobile-friendly, fast loading, SEO optimized. Includes hosting & support.

Description 2: Transparent pricing, no hidden costs. Get your business online fast. Free consultation call today!

Sitelinks:

- └─ See Our Portfolio (→ /portfolio)
- └─ Get Free Quote (→ /quote)
- └─ Client Reviews (→ /reviews)
- └─ Contact Us (→ /contact)

Callouts:

- └─ • 7-Day Delivery
- └─ • Fixed Pricing
- └─ • Mobile-Friendly
- └─ • Free Consultation

TEMPLATE 2: Outcome-Focused

Headline 1: Get 10+ Leads/Month From Website

Headline 2: Websites That Actually Get Results

Headline 3: Web Design Ahmedabad | [Agency Name]

Description 1: Tired of websites that don't bring customers? We build websites proven to generate leads. Includes SEO, mobile optimization, and conversion tracking.

Description 2: See real results in 30 days or money back. Free strategy session to discuss your goals.

Sitelinks:

- How It Works (→ /process)
- Pricing (→ /pricing)
- Success Stories (→ /case-studies)
- Free Consultation (→ /book-call)

Callouts:

- 30-Day Results Guarantee
- Conversion Tracking Included
- SEO Optimized
- Transparent ROI Reporting

TEMPLATE 3: Speed-Focused

Headline 1: Website Design in 7 Days

Headline 2: Fast, Professional, Affordable

Headline 3: ₹35,000 | Ahmedabad Web Agency

Description 1: Need a website urgently? We deliver professional websites in just 7 days. Includes design, development, hosting, and mobile optimization.

Description 2: No long wait times. Clear communication. Fixed price, no surprises. Start your project today!

Sitelinks:

- See Delivery Timeline (→ /how-it-works)
- View Packages (→ /pricing)
- Recent Projects (→ /portfolio)
- Get Started Now (→ /contact)

Callouts:

- 7-Day Guarantee
- Fixed Price ₹35,000
- No Hidden Costs
- Free Revisions

Ad Copy Best Practices

DO:

- ✓ Include keyword in Headline 1 (improves Quality Score)
- ✓ Include location in headline (for local services)
- ✓ Use numbers (₹35,000, 7 days, 50+ clients)
- ✓ Address pain point (slow website, no leads, expensive)
- ✓ Clear CTA (Call Now, Get Quote, Free Consultation)
- ✓ Use all extensions (sitelinks, callouts, call, location)
- ✓ A/B test 3-5 variations per ad group

DON'T:

- ✗ Write generic ads ("We do web design" — so does everyone)
- ✗ Use ALL CAPS (Google disapproves)
- ✗ Use excessive punctuation (!!! or ???)
- ✗ Make claims you can't prove ("Best in India" — needs proof)
- ✗ Ignore mobile (60%+ searches are mobile)
- ✗ Forget phone number extension (people want to call)

3.5 BUDGET CALCULATION FORMULA

How Much to Spend (Exact Math)

THE FORMULA:

STEP 1: Determine your target Cost Per Acquisition (CPA)

CPA = How much you can afford to spend to get one customer

Example (Web Design Agency):

- Average project value: ₹50,000
- Profit margin: 40% = ₹20,000 profit
- Willing to spend on marketing: 20% of profit = ₹4,000
- TARGET CPA: ₹4,000 per customer

STEP 2: Estimate conversion rate

Conversion Rate = $(\text{Leads} \div \text{Clicks}) \times 100$

Industry averages:

- Google Search Ads (B2B services): 2-5% conversion rate
- Let's use 3% (conservative)

STEP 3: Calculate Cost Per Click (CPC) you can afford

Formula:

Affordable CPC = Target CPA $\times$ Conversion Rate

Example:

- Target CPA: ₹4,000
- Conversion Rate: 3% (0.03)
- Affordable CPC: $\text{₹4,000} \times 0.03 = \text{₹120}$

This means: You can spend up to ₹120 per click and still be profitable.

STEP 4: Determine keywords within budget

Go to Google Keyword Planner:

- Filter keywords with $\text{CPC} < \text{₹120}$
- Focus on these keywords first
- Skip keywords with $\text{CPC} > \text{₹120}$ (not profitable yet)

STEP 5: Calculate monthly budget

Formula:

Monthly Budget = Desired Customers/Month $\div$ Close Rate $\times$ Affordable CPC $\div$ Conversion Rate

Example:

- Desired customers: 5/month
- Close rate: 20% (1 in 5 leads becomes customer)
- Leads needed: $5 \div 0.20 = 25$ leads/month

- └─ Conversion rate: 3%
- └─ Clicks needed: $25 \div 0.03 = 833$ clicks/month
- └─ Affordable CPC: ₹120
- └─ Monthly Budget: $833 \times ₹120 = ₹99,960$ /month

Wait, that's a lot! Let's work backwards with a realistic budget:

STEP 6: Work backwards from available budget

You have: ₹15,000/month for Google Ads

Formula:

Clicks you'll get = Budget $\div$ Average CPC

Leads you'll get = Clicks $\times$ Conversion Rate

Customers you'll get = Leads $\times$ Close Rate

Example:

- └─ Budget: ₹15,000/month
- └─ Average CPC: ₹80 (from Keyword Planner)
- └─ Clicks: $₹15,000 \div ₹80 = 187$ clicks
- └─ Conversion rate: 3%
- └─ Leads: $187 \times 0.03 = 5.6$ leads
- └─ Close rate: 20%
- └─ Customers: $5.6 \times 0.20 = 1.1$ customers/month

Result: ₹15,000/month budget = 1-2 customers/month = ₹50,000-1,00,000 revenue

ROI: 3-6x (Great!)

Budget Scaling Strategy

MONTH 1: Testing (₹10,000-15,000)

Goal: Find which keywords convert best

Expected: 1-2 customers

Action: Identify winning keywords, pause losers

MONTH 2: Optimization (₹15,000-20,000)

Goal: Focus budget on winning keywords only

Expected: 2-3 customers

Action: Improve ad copy, test landing pages

MONTH 3: Early Scaling (₹20,000-30,000)

Goal: Increase budget on proven winners

Expected: 3-5 customers

Action: Add new related keywords, expand locations

MONTH 4-6: Aggressive Scaling (₹30,000-50,000+)

Goal: Max out profitable keywords

Expected: 5-10 customers

Action: Add Display retargeting, YouTube awareness

RULE: Only scale if ROI stays above 2x (₹2 revenue per ₹1 spent)

3.6 LANDING PAGE REQUIREMENTS

What Makes a High-Converting Landing Page

THE MUST-HAVES:

1. MESSAGE MATCH (CRITICAL)

└─ Ad headline MUST match landing page headline

Example:

Ad: "Professional Web Design in 7 Days | ₹35,000"

Landing Page H1: "Get Your Professional Website in Just 7 Days — ₹35,000 Fixed Price"

✗ WRONG:

Ad: "Professional Web Design in 7 Days"

Landing Page H1: "Welcome to [Agency Name]" ← Generic, doesn't match

Why it matters:

└─ User clicked expecting "7 days + ₹35,000"

└─ If landing page doesn't deliver that message immediately, they leave

2. CLEAR VALUE PROPOSITION (Above the Fold)

└─ Visitor should know what you offer in 3 seconds

Formula:

[What you do] for [who] to [achieve what result] in [timeframe]

Example:

"Professional Websites for Ahmedabad Businesses to Get More Customers Online in 7 Days"

3. STRONG CTA (Call-to-Action)

└─ Tell visitor EXACTLY what to do next

Good CTAs:

✓ "Get Free Quote Now"

✓ "Call Us: +91-XXXXX-XXXXX"

✓ "Book Free Consultation"

✓ "See Our Work → Portfolio"

Bad CTAs:

✗ "Learn More" (vague)

✗ "Click Here" (what happens?)

✗ "Submit" (no benefit mentioned)

4. SOCIAL PROOF (Trust Signals)

└─ People trust what others say more than what you say

Types:

└─ Client logos (50+ businesses trust us)

└─ Testimonials with photo + name ("Real people")

└─ Reviews (Google, Facebook ratings)

└─ Case studies ("We helped X get Y results")

└─ Awards/certifications (if any)

5. FAST LOAD TIME (<3 seconds)

└─ Every 1-second delay = 7% fewer conversions

Test:

└─ Google PageSpeed Insights

└─ Target: 90+ score on mobile

6. MOBILE-FRIENDLY (60%+ traffic is mobile)

└─ Test on actual phone

Checklist:

└─ Text readable without zooming

└─ Buttons large enough to tap

└─ Forms easy to fill

└─ No horizontal scrolling

7. MINIMAL DISTRACTIONS

└─ Remove navigation menu (no escape routes)

└─ One goal: Get them to contact you

Keep:

└─ Headline

└─ Value proposition

└─ CTA

└─ Social proof

└─ Contact form/phone

Remove:

└─ Navigation menu (or minimal)

└─ Unrelated links

└─ Pop-ups (unless exit-intent)

8. CLEAR CONTACT OPTIONS

└─ Make it EASY to reach you

Include ALL:

└─ Phone number (click-to-call on mobile)

└─ Contact form (3-5 fields max)

└─ WhatsApp button (huge in India)

└─ Office address (builds trust for local services)

Landing Page Template (Structure)

=== SECTION 1: HERO (Above the Fold) ===

[LOGO]

[PHONE: +91-XXXXX-XXXXX]

H1: Get Your Professional Website in Just 7 Days

H2: ₹35,000 Fixed Price | Mobile-Friendly | SEO Optimized

[CTA BUTTON: Get Free Quote →] [SECONDARY CTA: See Our Work]

[Hero Image: Website mockup or happy client photo]

=== SECTION 2: BENEFITS (Why Choose Us) ===

What You Get:

3.7 COMMON MISTAKES (Where Money Burns)

Top 10 Google Ads Mistakes (And How to Avoid)

MISTAKE 1: Sending All Traffic to Homepage

❌ WRONG:

└─ Ad: "Web Design Services in Ahmedabad"

→ Landing Page: Homepage (shows everything: services, about, blog, contact)

✅ RIGHT:

└─ Ad: "Web Design Services in Ahmedabad"

→ Landing Page: Dedicated "Web Design Services" page (focused, one goal)

Why it matters:

Homepage has too many distractions. Dedicated landing page = 2-3x higher conversion.

MISTAKE 2: Not Using Negative Keywords

❌ WRONG:

└─ Keyword: "web design" (broad match)

→ Shows for: "free web design", "web design jobs", "web design course"

→ You pay for irrelevant clicks

✅ RIGHT:

└─ Add negative keywords: "free", "jobs", "course", "tutorial", "salary"

→ Only show for relevant searches

Savings: 20-40% of wasted spend

MISTAKE 3: Ignoring Quality Score

❌ WRONG:

└─ Quality Score of 3-4 (low)

→ You pay 2-3x more per click than competitors with Quality Score 8-10

✅ RIGHT:

└─ Improve Quality Score:

└─ Match ad copy to keywords

└─ Match landing page to ad copy

- └─ Improve landing page speed

Result: Same position, 50% lower CPC

MISTAKE 4: Setting "Maximize Clicks" Bidding

✗ WRONG:

- └─ Goal: Maximize Clicks (Google's auto-bidding)
 - Google gets you clicks, but not QUALITY clicks
 - Lots of traffic, few conversions

✓ RIGHT:

- └─ Start: Manual CPC (control your bids)
- └─ Later: Maximize Conversions or Target CPA (once you have conversion data)

Why: You want CONVERSIONS, not just clicks

MISTAKE 5: Not Tracking Conversions

✗ WRONG:

- └─ No conversion tracking set up
 - You don't know which keywords/ads bring customers
 - Flying blind, wasting money

✓ RIGHT:

- └─ Set up conversion tracking:
 - └─ Form submissions
 - └─ Phone calls
 - └─ WhatsApp clicks

Now you know: Keyword X brought 5 customers, Keyword Y brought 0 → Pause Y, increase budget for X

MISTAKE 6: Using Only One Ad per Ad Group

✗ WRONG:

- └─ 1 ad per ad group
 - No way to test what works better

✓ RIGHT:

- └─ 3-5 ads per ad group (A/B testing)
 - After 100 clicks, pause losing ads, keep winners

Example:

Ad A: "Professional Web Design" → CTR 2%

Ad B: "Website Design in 7 Days" → CTR 5%

Action: Pause Ad A, create 2 more variations similar to Ad B

MISTAKE 7: Broad Geographic Targeting

❌ WRONG:

- └ Target: All of India (for a local service)
 - Show ads to people in Mumbai, Delhi who will never hire you in Ahmedabad
 - Wasted clicks

✅ RIGHT:

- └ Target: Ahmedabad + 50km radius
 - Only pay for clicks from people who can actually visit your office or use your service

Savings: 50-70% of budget

MISTAKE 8: Running Ads 24/7 (When You're Not Available)

❌ WRONG:

- └ Ads run 24/7
 - Someone clicks at 11 PM, fills form
 - You respond next day at 10 AM (13 hours later)
 - They already hired someone else

✅ RIGHT:

- └ Ad schedule: Only when you can respond quickly
 - Mon-Sat, 9 AM - 8 PM (when you're available)

Result: Higher conversion rate (fast response = more customers)

MISTAKE 9: Not Using Ad Extensions

❌ WRONG:

- └ Basic text ad only
 - Takes up small space, easy to miss

✅ RIGHT:

- └ Use ALL extensions:
 - └ Sitelink (4 additional links)
 - └ Callout (bullet points)
 - └ Call extension (phone number)
 - └ Location extension (address)
 - └ Structured snippets (services list)

Result: 2x larger ad, takes up more screen space, 30-50% higher CTR

MISTAKE 10: Giving Up Too Early

WRONG:

- └ Run ads for 2 weeks
 - Only 3 leads
 - "Google Ads doesn't work!" → Stop campaign

RIGHT:

- └ Run for 3 months minimum:
 - └ Month 1: Learning and testing
 - └ Month 2: Optimization based on data
 - └ Month 3: Scaling what works

Ads need time to collect data and optimize. Most agencies give up right before it starts working.

3.8 FOR YOUR AGENCY SPECIFICALLY

Using Google Ads to Get Web Design Clients

CAMPAIGN STRUCTURE FOR YOUR AGENCY:

CAMPAIGN 1: Brand Protection

Goal: Show ads when people search your agency name

Budget: ₹2,000-3,000/month (low CPC, protect territory)

Ad Group: [Your Agency Name]

Keywords:

- └─ [your agency name]
- └─ "[your agency name]"
- └─ "[your agency name] web design"

Why? If someone searches your name, they already know you. Don't let competitors steal that click.

CAMPAIGN 2: Local Web Design Services (PRIMARY)

Goal: Get leads from people searching for web design in your city

Budget: ₹8,000-12,000/month (this is where most leads come from)

Ad Group 1: General Web Design

Keywords:

- └─ [web design ahmedabad]
- └─ [website design ahmedabad]
- └─ [web designer ahmedabad]
- └─ "web design services ahmedabad"

TOTAL: ₹15,000/month

EXPECTED RESULTS (Realistic):

Month 1 (Learning Phase):

- Clicks: 150-200
- Leads: 4-6
- Customers: 1-2
- Revenue: ₹50,000-1,00,000
- ROI: 3-6x

Month 2 (Optimization):

- Clicks: 180-220 (same budget, better targeting)
- Leads: 6-9
- Customers: 2-3
- Revenue: ₹1,00,000-1,50,000
- ROI: 6-10x

Month 3+ (Scaling):

- Increase budget to ₹20,000-25,000/month
- Leads: 10-15/month
- Customers: 3-5/month
- Revenue: ₹1,50,000-2,50,000/month
- ROI: 6-10x (sustainable)

PART 4: META ADS (AUDIENCE TARGETING)

[DOCUMENT TRUNCATED - At 42,000+ words. This is Part 1 of the Knowledge document.]

NEXT SECTIONS TO COVER:

- Part 4: Meta Ads (Facebook/Instagram) Complete Guide
- Part 5: Google vs Meta - Decision Framework
- Part 6: Revenue Tracking & Optimization

Would you like me to:

1. Continue with Part 4 (Meta Ads) in a new artifact?
2. Jump to Part 5 (Google vs Meta Decision Map)?
3. Create a separate "Quick Start Guide" (condensed version)?
4. Focus on a specific section you need most urgently?
