Day 8-14: Local Outreach (Do ALL of These!)

A. In-Person Cold Calling (Most Effective!)

B. Facebook/Instagram DMs (Second Most Effective)

- Find local businesses with bad/no websites
- Send friendly DM: "Hey! Love your [product/service]. I build websites for local businesses. Would you be interested in a free website audit?"

Closing Script: "Based on what you've told me, I'd recommend [Package Name] for \$[Price]. This includes [list features]. I can have this ready in [X] days. Does that work for you?"

If They Say "Too Expensive":

Part 8: COMMON CLIENT QUESTIONS & YOUR ANSWERS

"Why so expensive? My nephew can do it for free!"

Your Answer: "I understand budget is important! Here's the difference:

- Professional design that makes you look credible
- SEO setup so customers find you on Google
- Mobile-friendly (60% of visitors are on phones)
- Secure and backed up
- Training so you can update it yourself
- I'm here for support, not just ghosting after

Your website represents your business 24/7. Would you want to risk customers seeing an amateur site?"

"Can you make it cheaper?"

Your Answer (Negotiation):

Option 1: "I can do a basic 5-page version for \$[lower price], but it won't include [remove some features]"

Option 2: "I can offer a payment plan: \$[X] upfront, then \$[Y] per month for 3 months"

Option 3: "I'm offering a [neighborhood/industry] discount this month only - \$[slightly reduced price]"

DON'T: Cut your price more than 20% or you devalue yourself

"How long until I see results/customers?"

Your Answer: "Great question! Here's the realistic timeline:

- Week 1: Website launches
- Weeks 2-4: Google starts indexing your site
- Months 2-3: You'll start appearing in search results
- Month 3+: Consistent traffic and leads

To speed this up, I recommend:

- Updating Google Business Profile
- Getting customer reviews
- Sharing website on social media
- Optional: Monthly blog posts (\$100/month - I can handle this)

Most clients see their first website-generated customer within 30-60 days"

"I need this done in 2 days!"

Your Answer: "I can definitely prioritize your project! For rush delivery (2-3 days), there's a 50% rush fee: \$[higher price]

Normal timeline is 7 days at \$[normal price]

Which works better for you?"

Pro Tip: Rush jobs often mean client is desperate = they'll pay more

"Can you maintain it for me?"

Your Answer: "Absolutely! I offer monthly maintenance:

\$150/month includes:

- Weekly backups
- Security updates
- 1 hour of edits per month
- Monthly analytics report
- Priority support

This keeps your site secure, fast, and up-to-date. Want to add this?"

Part 11: RED FLAGS TO AVOID (Save Yourself Headaches!)

BAD CLIENT WARNING SIGNS:

✗ "Can you do it for free? I'll pay you when I make money" → RUN AWAY. They won't pay.

✗ "I have a huge project, but start with this small thing first" → The "huge project" never comes. They're testing if you work for free.

✗ "My budget is \$200 for a 20-page website" → They don't value your work. Politely decline.

✗ Asks for unlimited revisions → Set boundary: "Package includes 2 rounds of revisions. Additional rounds are \$100 each"

✗ **Won't pay deposit** → "No deposit, no work" - this is standard practice

✗ **Constantly changes mind / adds features** → Scope creep! Say: "That's outside our agreement. I can quote that separately"

✗ **Rude or disrespectful** → Fire them. No amount of money is worth the stress

GOOD CLIENT GREEN FLAGS:

- ✓ Responds to emails quickly
 - ✓ Has content/photos ready
 - ✓ Pays deposit immediately
 - ✓ Refers to you as "expert" / trusts your judgment
 - ✓ Realistic timeline expectations
 - ✓ Open to ongoing maintenance relationship
-

- ☒ Basic coding knowledge (more than enough!)
- ☒ AI tools (can do 80% of the work)

-  Templates (just customize them)
-  Local market (thousands of businesses need websites)

The difference between you and successful freelancers? → They STARTED. They took imperfect action.

Your first website will be messy. That's okay! **Your first pitch will be awkward.** That's normal! **Your first client will be challenging.** You'll learn!
